

SPRAY CHILLING NOZZLES

Meat Processing Industry

SprayNozzle ENGINEERING
Total Spraying Solutions

Spray Nozzle Engineering provides spray chilling nozzle assemblies to suit your choice of nozzle requirement:

- Full cone
- Hollow cone
- Flat fan

Spray nozzle patterns are dependent on your application, whether static or mobile.

Features

- Stainless steel nozzles available in full cone, hollow cone, flat fan and wide flat fan.
- Various flow rates and spray angles available for all chilling applications.
- New Wilger Optional Drift reduction flat fan nozzles, larger droplets means less drift, better cooling efficiency, quick removal design for ease of maintenance.
- Low pressure diaphragm check valve to enable shut-off when system is turned off and keeps pipe filled for start up.
- Clamps are available in 1", 1 1/4", 1 1/2", 2" pipe sizes.

Twin nozzle assembly for single pipe run and dual spray for two carcasses.

VARIETY OF SPRAY NOZZLE PATTERNS, FLOWS & SPRAY ANGLES
