Hose Reels for Mining

BY REEL TECH PTY. LTD.

NEW BOLT-ON ACCESSORIES

"BOLT-ON" ERGONOMIC & SAFETY FEATURES FOR PITBULL™ REELS

Mining hose storage just got easier and safer

Address hose handling injuries with improved ergonomics. Choose from a range of easily fitted technologies to increase productivity and safety:

EZI-DEPLOY™

Auto Declutching System

No levers, buttons, or electronics required. Just pull and go! Fully automatic "Drag-free" payout with the lowest resistance, EZI-DEPLOY™ clutch systems offers smooth reel operation to minimise operator strain injuries and reduce excessive force that can prematurely damage equipment. Critical for longer hose lengths and larger 1", 1½" & 2" hoses.

FlatWinder™

Automatic Hose Layering Technology

Readily adapted to any PitBull Reel for efficient easy layering of hose during storage. Minimise injuries, reduce hose damage and increase productivity.

Reel-In-Control™

Wireless Remote Control

Cut response times and increase safety with frequency hopping technology. This feature allows for safer single user operation and increased productivity.

Safe-R-Reel™

Rewind Speed Control

Reel Tech's patented Safe-R-Reel™ easy bolt-on brake cassette is designed for PitBull Spring Reels. Ensuring a controlled speed during rewind while minimising injuries and hose damage.

Safe-R-Reel™

Follow Me Hose Guide

Swivelling Hose Guide For FlatWinder™ Systems

Market's first multi directional swivelling hose guide allows flexible use at any angle. A safer hose handling solution that reduces hose jam and damage.

Hose Reels for Mining

MAKE YOUR BEST REEL EVEN BETTER

5 NEW PITBULL BOLT-ON ACCESSORIES TO REDUCE HOSE HANDLING INJURIES

While saving time and money

Reel Tech's patented Bolt-On Innovations are designed to improve safety and reduce handling and operating time. Easily retrofittable to existing reels, makes it easy to upgrade to our latest technology that helps reduce injuries, downtime, hose wear and equipment damage.

Choose from the following exclusive bolt-on technologies:

- 1 EZI-DEPLOY™ Auto Hose Declutching** - Fully automatic "Drag-free" payout with the lowest pull resistance. Critical for longer hose lengths and larger 1", 1^{1/2}" & 2" hoses.
- 2 FlatWinder™ Automatic Hose Layering**
Easy layering of hose during storage. Minimise injuries, reduce hose damage and increase productivity.
- 3 Reel-In-Control™ Wireless Remote Control**
Safer single user operation and increased productivity.
- 4 Follow Me Hose Guide Swivelling Hose Guide**
Flexible use at any angle. Used in conjunction with FlatWinder™. Safer hose handling that reduces hose jam and damage.
- 5 Safe-R-Reel™ Rewind Speed Control for Spring Reels**
Controlled safer rewind speeds. Minimise injuries and hose damage.

- ➔ Improve safety
- ➔ Heavy duty
- ➔ Modular construction
- ➔ Simple installation
- ➔ Low maintenance
